

## Process Air & Liquid Filtration

high performance filter media

### Norafin Crystalen® - High Performance Filter Media

#### Hightech Spunlace Technology

- Fiber entanglement by 3 dimensional high pressure water jets

#### Better Filtration Efficiency = Lower Emission

- Finer pore size
- Tighter pore size distribution
- Superior surface & cross section homogeneity

#### Better Mechanical Strength = Longer Life Time

- No scrim damaging
- Higher density of fiber entanglement
- Superior uniformity

#### Available in a wide range of material

- PET, PAN, PPS, m-Aramid, Kermel, P84, PTFE
- 30 g/m<sup>2</sup> – 700 g/m<sup>2</sup>

#### Applications

- Bag filters
- Cartridge filters
- Pleated filters
- Pocket filters
- Band filters
- Drum filters
- and many more...
