

Process Liquid Filtration Plate and Frame Press Filter

Hightech Spunlace Technology

- 3 dimensional fiber entanglement by high-pressure water jets

Better Filtration Efficiency

- Finer pore size, tighter pore size distribution
- Higher density of fiber entanglement
- Superior surface & cross section homogeneity

Better Mechanical Strength

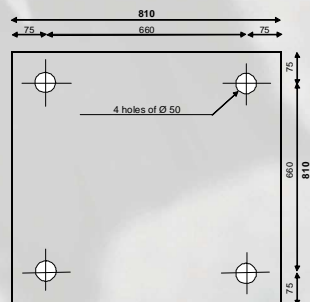

- Strong and isotropic material
- Resistant to pressure

Available in a wide range of

- **Material:** PET, PA, PPS, m-ARAMIDE, PTFE
- **Weight:** 200 gsm up to 650 gsm

Applications/Format Size:

- Plate Press Filter
- Various format sizes: 310x350, 470x470, 810x810...
