Norafin Technology & Quality

Norafin's Production Site in Mildenau

Norafin – Our nonwoven Technology

Our state-of-the-art technical installations permit a great deal of flexibility allowing us to

- engineer multi-layered roll goods
- create a sophisticated fiber mix depending on requirements
- process a wide variety of specialty, high end fibers such as PTFE, PPS, P84, meta & para aramides as well as natural fibers
- run both very large campaigns and run smaller, special product campaigns
- offer various in-house aftertreatment options
- provide calandered, apertured, scrim supported webs of various colours according to customers' requirements
