

## Norafin 3D Performance

### Innovative Spunlace Material

- fiber entanglement by 3 dimensional high pressure water jets

### Beneficial Product Features

- for performance apparel
- medical use and
- hygiene applications

### Improved TPP Rating in Heat Insulation

Thanks to the air trapped in the fabric and the material's specific surface, the three-dimensional hydro embossed web offers improved insulation properties as well as improved comfort to the end user.

For medical and hygiene properties, the 3D Performance Fabric shows enhanced cleaning properties due to the material's texture that enables a better absorption of dust and liquids.
